

WE ARE SFILTRACE

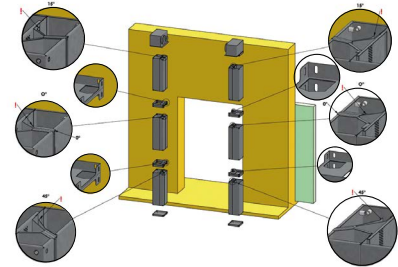

**WE HANDLE YOUR ENERGY SAVINGS
AND WORKING COMFORT**

WE CAN SEE WHAT IS INVISIBLE TO OTHERS

Invisible Air Doors POWERSTREAM®

Do you use a frozen-food storage room and fog forms in the open doors? Does undesired humidity leak in, is there ice accretion on the floor and frost around the doors? Are your costs for after-cooling of the premises high? Are you looking for a solution for your situation of two rooms with various temperatures and have so been unable to find a convenient and economical solution with the lowest energy consumption in the market? **Feel free to arrange for a personal presentation, we will propose a solution for you.**

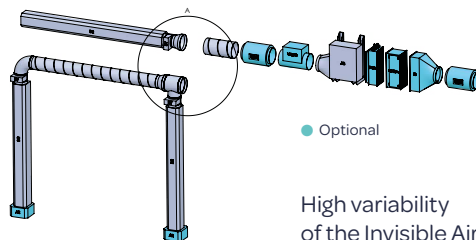

The technology is patented.

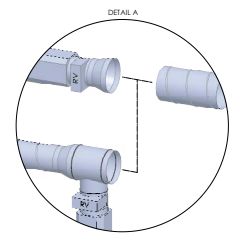

Invisible Air Doors AIRSTOP®

Do you frequently use opened gates in the halls and loading docks, with air exchange between two rooms with different temperatures affecting your working comfort and indoor temperature? When inside, are you annoyed by the outdoor wind, dust and insects? Is opening the mechanical doors time consuming for you? **We have an interesting and economical solution for you.**

High variability of the Invisible Air Doors.

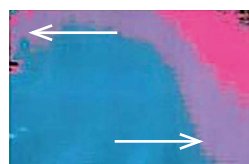

Other Technological Solutions

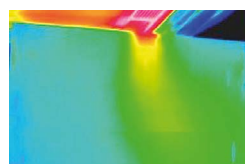

We also deliver technological design solutions for shopping centres, offices, banks, airports, shops, galleries, and various supermarket departments. We can separate areas with various odours, and we have many other professional solutions. **If you want to learn more, feel free to contact us.**

The products are tailor-made to the customer's needs.

Output from a thermal camera in two rooms with various temperatures

No protection

Conventional air curtain

Our technology

Together we will find a solution to help you save energies and improve the working comfort of your premises, as well as occupational safety.
